GLEICHEN, ALBERTA, WEDNESDAY, FEBRUARY, 8, 1928

SUBSCRIPTION \$2.00 PER YEAR

Gleichen Defeats Vulcan In Nov. 15 Series 7 to 4

Gleichen goes to Medicine Hat Friday, to play Hillcrest. Special coaches will be on the 4:30 train going east. These coaches will also be on the next passenger train back to Gleichen to accommodate the fans. For full information see Alex Lewis. A request is made that all who possibly can accompany the team to the gas town—Ladies specially requested to come.

On Saturday night the most thrilling and fastest exhibition of hockey ever seen in Gleichen took place when the much vaunted Vulcan team met its Waterloo, before the onslaughts of the 22nd Battery hockey boys, to the tune of 6-3 or 7-4 for the two games.

The first game being played at Vulcan, on soft ice, last Thursday, and resulted in a tie score of 1-1.

But the game Saturday night was a hum dinger and had the crowd frenzy with excitement. In the first Vulcan started out to force the game and for a few moments kept the puck down Gleichen's way, but not for long. In a little while Tiger, near the blue line lifted the puck into the Vulcan net. The game then shifted up and down the ice, Vulcan reacting to long shots when Bob Brown received the puck near the Gleichen blue line and went right through the Vulcan team, to the goal mouth and lifted in the puck for the second counter. Gleichen was playing a superior game to Vulcan, and holding the puck down Vulcan way, and rarely shot unless close in. Gleichen played more and better combination than Vulcan. Each goal keeper saved four times in this period.

In the 2nd the game had not been going very long when Si got the puck in a scrimmage and made another counter. Bob Brown shortly after made a solo rush having only the defence to beat, put in another counter. McGregor of Vulcan then took a chance and made the first counter for Vulcan. The period was fast, there were plenty of spills and there were some fine combination plays on both sides and Gleichen forward boys again started they could out skate and out play Vulcan. Each goalie actually saved 8 times.

In the third period Vulcan started to play in earnest and made two goals in rapid succession one by Hayes who made a solo rush and the other by Sloan from Dorsey, who got a close in shot. These two goals did two things it made the soldier boys get busy, so busy in fact that it completely took the heart out of the Vulcan boys even before Gleichen scored again. The play became so fast that the Vulcan forwards did not or could not back check, they did not have the spirit left in them to do so. Those last two goals were made in identical the same way. In a scrimmage around the Gleichen end, Tiger got the puck and he and Bob left for the other end like two streaks with the Vulcan forwards hopelessly out distanced and disheartened; and had only the defence to beat and Tiger passed the puck to Bob, who was within a few feet of the goal and who very deliberately and coolly lifted the puck in. The goalie and defence might have been a thousand miles away for all the effect they had in speeding up the shots. These two goals were the most beautiful play ever seen in the Gleichen rink and the crowd roared their approval. The game finished a moment later. Gleichen goalie saved 6 times and Vulcan saved 3.

Lineup of Teams

Vulcan—Goal, Dyon; Hayes and Leverington, defence; Sloane, McGregor and Dorsey, forwards. Subs: McKinnon and Magee.
Manager, H. Sutherland.
Gleichen—Goal, Al Wilson; defence O. Wilson and T. Johnston; forwards

B.E.S.L. Elect Officers At Annual Meeting

The Annual General meeting of the Gleichen Branch, No. 13, of the British Empire Service League was held in the Clubroom of the Gleichen Community Hall with the following present: 1st Vice-Pres. R. W. Brown in the chair, Sec.-treas. M. Wade, A. G. B. Lewis, T. Bates, F. Bates, Peter Maclean, R. W. Harrison, J. Egles, W. H. Busby, J. Moss, B. C. Riches, W. Varndell, B. T. Tomlinson and I Gove. The minutes of the meeting held on Nov. 28th were read and adopted without any discussion.

The 2nd Monday in each month was decided upon as the regular meeting night.

A motion was passed placing this Branch on record expressing the utmost and sincerest sympathy to Lady Haig in her deep bereavement. It was decided that the branch shall attend the divine service to be held in commemoration of Field Marshal Earl Douglas Haig on Feb. 12th, at 3 p.m. in the Gleichen Community Hall in conformity with the request from Dominion Headquarters, service will be open to the public. A minute of silence standing with head bowed was observed in memory of the late Grand President of the B.E.S.L. Earl Haig. Comm. Chapl. F. M. Ross Gibeby will be asked to take charge of the memorial service.

The election of officers was then proceeded with.

T. W. Bates Sr. and Harry Scott who have been honorary president of the G.W.V.A., were re-elected honorary presidents of the B.E.S.L. of Gleichen.

President B. T. Tomlinson, Sergt R.C.M.P.

1st Vice-Pres. R. W. Brown, 2nd Vice-Pres. Peter Maclean. Sec.-Treas. M. Wade. Executive, J. Egles, R. W. Harrison and J. Moss.

A vote of thanks was returned to all 1927 officers for their work and interest, also to M. Wade who had filled the place of secretary-treasurer since the departure of J. Lunan. A motion was passed concerning the decoration of the graves of comrades buried in the Gleichen cemetery.

Bob Brown, Tiger Lyon and Si McKay; subs, C. Brown, Bill Taylor; Pat Beach, sub goalie.

Manager, Alex Lewis.

Referee: Lou Doll, of Calgary.

Penalties—Vulcan, Hayes (2 Mins.) Sloane (1 min), Dorsey (1 min). Gleichen, no penalties.

Shots at goal—Vulcan, 16; Gleichen, 23.

According to the gate receipts the crowd was a little larger than the game played the week previous.

The Vulcan defence is not of the same caliber as Gleichen and seemed easy to penetrate. Vulcan rarely if ever got close in to shoot at the Gleichen goal and then from an angle.

The Gleichen forwards could at all times out skate the Vulcan forwards and in the last period when Vulcan subbed they used 2 men at a time.

Given fast ice it looks as if Gleichen can hold its own with any team.

Vulcan was almost exhausted when the 3rd was half over which could be plainly seen, from the fence, whereas the opposite could be said of the Gleichen bunch for they were going great-guns at the end.

Lou Doll, the referee did not check the players up as closely as Lynch, consequently the game was very much faster.

JONES — DAUPHINEE

At 11 o'clock Saturday morning St. Andrew's Church was filled to capacity with relatives and friends to witness the marriage of Mary Florence Jones, youngest daughter of Mr. and Mrs. A. E. Jones, pioneers of Gleichen, to Mr. Willard Ronald Dauphinee, one of Arrowwood's successful young farmers.

Owing to Rev. F. M. Ross Gibeby,

Rev. Canon Gale Visits Gleichen

The Rev. Gale, the Rural Dean of the Calgary Deanery, which runs east along the C. P. R. to Brooks and west to Banff, visited Gleichen from Sunday, Jan. 29, until Thursday, Feb. 2nd. On Sunday evening the service was conducted in St. Andrew's by the Rev. F. M. Ross Gibeby of the Blackfoot Reserve and Canon Gale preached to a good congregation.

The special purpose of Canon Gale's visitation was to arrange definitely for the carrying on of the work of the Parish of Gleichen under the direction of a suitable clergyman. After a careful house to house visitation and a representative gathering of the people on Wednesday night it was decided to ask the bishop of the diocese to endeavour to procure a suitable clergyman for the parish which would include a large surrounding district.

At the conclusion of this meeting, over which Canon Gale presided, the annual parochial meeting was held, at which the Rev. F. M. Ross Gibeby took the chair at the request of the rural dean. The annual financial statements were read by the various treasurers. Mr. C. V. Cocks read the treasurer's report for the parish or 1927, Mrs. Egles for the W. A., and Mr. T. W. Bates Jr. read the Sunday School report. In spite of the fact that the parish had had no resident clergyman throughout the year, he work done by both the W. A. and Sunday School was very commendable, and especially noteworthy. The action of the various officers of the church was then proceeded with and he following was the result:

Rector's Warden Mr. Ostrander.

People's Warden Mr. C. V. Cocks.

Vestry: Messrs. Pinder, C. W. Harrison, Goodwin, Owen, T. W. Bates Jr., and Wm. McConnell.

Auditors: Major Lewis and Rev. Gibeby.

A vote of thanks was tendered the members of the W. A. for the splendid work they accomplished during the year, to which the President Mrs. W. H. James graciously replied; the officers of the S. S. for their interest in the children, to which Mr. Bates Jr., the superintendent, responded, the wardens and vestry for their work, the Rev. F. M. Ross Gibeby for his interest and help at all times of need in the parish of St. Andrew's.

Major Lewis proposed a vote of thanks to Canon Gale for the great inspiration he had brought to the Gleichen congregation through his visit. In concluding, it was suggested that his Lordship, the Bishop of Calgary, be asked to pay a visit to Gleichen in the near future in order to meet the members and adherents of the church. Canon Gale promised to arrange with the bishop for this visit, due notice of which will be given ahead of time.

One of the most helpful and encouraging meetings ever held in St. Andrew's was brought to an end by the Rev. Canon Gale pronouncing the benediction.

being summoned to his home in Vancouver the previous night, Rev. Mr. Corcoran, of the United Church, very profitably conducted the beautiful marriage ceremony of the Anglican church.

The bride was given away by her father and wore a beautiful rose silk-crepe-de-chine dress, trimmed with silver, with hat to match and carried a bouquet of pink roses. Her sister Emma was the bride's maid, while Mr. Douglas James was the best man.

Immediately after the wedding the bride party made a tour of the town, with Mr. Rupert Hunter at the wheel, who made some wonderful turns at the corners that showed to great advantage the dozens of "thinkers" the boys had secretly attached to the auto. Arriving at the bride's home it was filled to capacity with relatives who partook of a bountiful wedding dinner.

Gleichen Curlers First Annual Bon'Spiel February 15-16-17

A general meeting of the Gleichen Curling Club was held in the Community Hall dining room at the close of the annual banquet with the president and vice-president both presiding. After a few short speeches the minutes were read and adopted on motion from Owen and Ostrander.

A financial report was read by the treasurer which indicated a favorable balance on hand. A motion was made by Cuthbert and Hall that the coal bill and caretaker's salary be paid from this balance.

L. Cuthbert introduced the subject about the purchase of the rink property and that if this was to be done, the club should be incorporated. A motion to this effect was made by D. Hutcheson and Ostrander. The motion was carried.

A further statement was made by the treasurer that the treasury balance was \$100.00 and that when fees still due were paid in full there would be approximately \$150.00 on hand. F. Owen suggested that a special effort should be made to collect those fees as the money was needed to clear the season's business.

Discussion followed as to whether the rink should purchase the lot on the west end of the site of the present curling property. A reading of the minutes of the annual general meeting Nov. 14th showed that negotiations had been left with a committee of three, J. Boyd, L. Cuthbert, and T. H. Beach regarding this purchase, and the meeting was of the opinion that the committee continue in this capacity.

After some discussion, L. Cuthbert moved that a bon 'spiel be held in Gleichen on Feb. 15-16-17; two committees were appointed one for a prize list and one for a schedule to be drawn.

F. Owen was appointed convener of the prize committee with power to add to the committee. J. Boyd was appointed convener of the schedule committee for the bon 'spiel. H. G. Bates was appointed head of the ice committee during the bon spiel. Each member was assessed \$1.50 for prizes for the event.

An interim competition was also decided upon and each member asked to contribute 25c. towards prizes for the same.

A motion carried to the effect that no more than two substitutes be allowed to play on a rink without defaulting.

F. Owen and Clifford moved that a letter of thanks be forwarded to the auxiliary of the Canadian Legion for the splendid repast provided for the annual banquet. The following rinks were drawn up:

Clifford, Beach, Gove and Ostrander.

Owen, Harrison, Harding, and Malory.

Bates, MacCullum, Blakeman and Solway.

Brown, McLeod, Cook and Melvin.

Cuthbert, Henderson, James and Rishaug.

Hall, Hutcheson, Tomlinson and Little.

Robinson, Jeffers, Heimbecker and Mattson.

McDonald, Mitchell, Purcell and Armstrong.

Boyd, Black, Maclean and Brewer.

They were the recipients of many beautiful and useful wedding presents. Mr. and Mrs. Dauphinee left that afternoon on the train for Vancouver to spend their honeymoon and upon return will make their home close to Arrowwood.

A great crowd assembled at the station and gave the happy young couple a hearty send off amid showers of confetti.

The bride is a Gleichen born girl and a very popular young lady throughout the entire country from beyond Milo in the south to the Red Deer river in the north, with whom the Call joins

Cluny Dramatic Society Elected By Excellent Entertainers

The three-act drama staged in the Gleichen Community Hall last Thursday night by the Cluny Dramatic Society proved a real treat to the well-filled house it attracted and the artists showed ability on a par with any amateurs that might be picked from any of the largest towns in the province. And no doubt should the same ladies and gentlemen favor Gleichen with another performance they will receive a reception that will surprise them, although they expressed their pleasure with the splendid reception received as well as the attendance and financial success.

While each member of the troop deserve credit Bill McLaughlin was the outstanding artist in the role of a negro, ably assisted by Mrs. Leavens, and there is no doubt he has had previous experience along this line or that he has few peers at least in these parts.

The play was titled "A Fortunate Calamity" and contained fun in plenty and yet also had its moral.

A proud mother's part was played effectively by Mrs. L. Palmer, and Mrs. DeaHayes, her daughter, Alta, was a haughty girl of the get-rich-quick by hook or crook methods, while Ruth another daughter, Mrs. McCrindle, very artfully was "Just a plain girl," ran away to marry her lover Bernard Gullion, well taken by Ed Berriek, who located in a very happy home in the west and later became wealthy by a strike of oil on some of her property. Kate, the good natured Cook was taken by Nora Rillers materially helps the drama and finally marries "Joe Brown" the Revenue officer, well filled by Bob McCrindle, Gay Beatty took the difficult part of Albert Campbell, the real crook, working in cooperation with Alta.

In the end the mother, is robbed of all she possessed by the crook, finds her daughter Ruth, whom she drove from home, implores her forgiveness and is taken in a given a good home.

The Cluny artists were invited here by the Ladies Circle of the United Church and were the guests of Rev. and Mrs. Corcoran and Mr. and Mrs. Chalmers. Financially the evening's entertainment was a success, over \$60 net being realized, which was divided equally between the Cluny and Gleichen churches.

"HITCH YOUR DOLLAR TO A STAR"—FEB. 16th

There will be a programme given in the Union Church by the C.G.I.T., on Thursday 16.

Mrs. Saunders from Arrowwood or Miss Nix of Calgary, will speak besides some plays and songs.

A \$1.00 share admits one adult and a 50c. share admits 2 children under 14 years of age.

Shares are sold by the C.G.I.T., Tuxis, and Trail Ranger Groups.

In wishing Mr. and Mrs. Dauphinee all the good things they could possibly wish for themselves.

Grain Crops In 1928

The prediction has been made from many sources, and with but few reservations, if any, that the year 1928 gives promise of being one of the greatest years of development in Canada's history, marked by unprecedented activity in mining, manufacturing, building, water-power development, transportation, and a rising tide of immigration. Authorities in banking and finance are a unit in declaring that Canada is now in a position to take a giant step forward, and that apart from the financial ability and resources of Canada itself, both British and United States money will be available for sound development enterprises.

What of agriculture, the basic industry of Western Canada, and upon the prosperity of which much of the growth and prosperity of all Canadian industry depends?

It is generally recognized that agriculture occupies a stronger position today than it did a few years ago and that conditions have been steadily improving year by year. There is a feeling of hopefulness abroad that this situation will continue. But if 1928 is to prove a successful year for our Western farmers they must themselves take time by the forelock and lay the foundations of that success. It is now when the snow is on the ground and the temperature hovers around the zero point that the first step towards assuring good crops in the fall of the year must be taken.

Later in the year everybody, and especially the farmers, will look anxiously for adequate rainfalls at the right season, for bright sunny days, for an absence of frosts, hail, rust and other blighting agencies, and for good weather for harvest and threshing. But a combination of all these favorable conditions will not in themselves assure the West a bumper crop. Something more is required, and now is the time to provide it. The conditions noted above are not within the power of man to determine, but, fortunately, it is in his power absolutely to provide the first essential requirement, namely, good, clean seed possessing a maximum of germinating qualities.

Unless the best of clean seed is sown, the best and cleanest crops cannot be obtained. If weed seeds are sown, weeds and not wheat, oats, or other saleable grain will result. This fact is so obvious that it would seem quite unnecessary to lay any stress upon it. But what is the situation?

All Western farmers can profit from the lessons learned from a seed drill survey conducted by the Saskatchewan Department of Agriculture last year. In 25 townships samples of grain were taken from the seed drills of the farmers and tested as to grade. Out of each ten samples submitted in wheat, three graded No. 1 or No. 2, four graded No. 3, and three graded rejected.

The oats being sown did not make as good a showing, —16 per cent. graded No. 1 or No. 2, 16 per cent. graded No. 3, and 68 per cent. rejected. As in the case of wheat, the oats rejected was caused chiefly by the presence of noxious weeds. In other words, only three out of every ten farmers were sowing good, clean seed wheat, and only 16 out of every 100 farmers were sowing good, clean seed oats. Under such conditions, how can Western farmers expect to obtain large yields and a highly profitable return from their labor?

Ninety-seven per cent. of the farmers in these townships were using cleaning machinery of some kind, while 92 per cent. were using one or another of the recognized methods of treating grain for smut. It was established that the success, or non-success, in the operation of seed cleaning machines did not lie so much in the make of the machine used as it did in the man operating it. Another factor, of course, was the extent of the pollution of the seed stock. The moral is, that farmers should at this time overhaul their seed cleaning machines and make a close study of the best methods of operation. Of major importance is the obtaining of the cleanest possible seed to put through these machines.

There is a lot of truth in the claim of the Canadian Seed Trade Association that an investment too often overlooked in these days of mining and oil speculation, is the one of better seed. The assertion is made that one dollar invested in better seed during the spring should return at least six or seven dollars in the fall, and with right conditions and care it may return as high as ten or fifteen dollars.

Good, clean seed will not in itself assure a heavy and profitable crop, —there are many other factors involved, —but unless good, clean seed is sown it is certain that such a crop can never be harvested. It is necessary to begin at the beginning, and the seed sown is the beginning, whether it be of a crop of hard wheat or noxious weeds.

Canada Buys Own Bonds
Canada is now the largest purchaser of her own bond issues, having moved ahead of the United States in this respect for the first time at the year's end. The Dominion's bond purchases now run to \$297,156,116, as compared with the United States' absorption of \$294,554,547, and Great Britain's purchase of \$10,698,667.

The toy industry of the United States shows an increase of more than 1,300 per cent. in the last twenty years.

When the world hears only a man's mistakes it always discounts his real merits.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been recommended for 70 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Submitted Best Design

Woman Is Architect For New Shakespeare Memorial Theatre
A young English woman of 29, has been named architect of the new Shakespeare Memorial Theatre at Stratford-on-Avon. The design of Elizabeth Scott, daughter of a Bournemouth doctor, was unanimously selected from the 70 submitted to the Anglo-American selection committee.

Miss Scott comes from a family of architects. Her plans are described as a bold and splendid conception taking full advantage of the beautiful site on the banks of the Avon.

OUR WINTER WEATHER

A Trying Time For People With Weak Watery Blood

Canadian winter weather is a trying time for debilitated, run-down people. The close air of shut-up houses, lack of out-of-door exercise, the restricted diet of the season, all have their effect on weakened systems. There is always in such cases the danger of severe colds, attacks of influenza, or the still more dreaded pneumonia. There is no other time of year, when a bountiful supply of rich, red blood is so necessary; and the one way to keep the blood rich and pure and thus avoid winter trouble is through the use of Dr. Williams' Pink Pills. If, unfortunately, you have fallen a victim to influenza, or other winter troubles, this same medicine will restore your health and strength. Among those who have proved the value of Dr. Williams' Pink Pills is Miss Margaret Pearson, R.R. No. 3, Chatham. Miss Pearson had passed through a severe attack of influenza and says: "It left me so weak and run-down, that I could scarcely walk. Anemia set in and it almost seemed as if I would not pull through the winter, as I grew so weak that the least exertion would bring on fainting spells. I was under medical treatment, but it did not help me. Then one day in our local paper I read an advertisement of Dr. Williams' Pink Pills, and decided to try them. By the time I had used three boxes I felt much better, and continuing the use of the pills it was not long before I felt better than I had been before the influenza attacked me. My rapid recovery surprised my friends, and when asked 'What did you do?' I would proudly say, 'Not my doing, but Dr. Williams' Pink Pills.' To me, at least, the pills have been worth their weight in gold."

As a precaution against winter ills take Dr. Williams' Pink Pills now. Sold by all medicine dealers, or sent by mail at 50c a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Burbank Gardens To Go

California Estate Will Be Cut Up With Building Lots

The experimental gardens of the late Luther Burbank at Santa Rosa, which for more than twenty years attracted scientists throughout the world, are to be cut up into building lots, Mrs. Burbank, widow of the plant wizard, announced.

Burbank died in April, 1926, and shortly thereafter a move was started to preserve his three acres of gardens and continue his experiments. All plans, however, failed.

About one-quarter of the land will be retained by Mrs. Burbank.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating sore throats and chest, coughs, burns, scalds, cuts, bruises and sprains.

Money For Research Work

Chicago Philanthropist Gives Large Sum For Medical Research

A 47-year-old man and his wife, Mr. and Mrs. Albert D. Lasker, Chicago, have established a foundation for medical research at the University of Chicago, with an initial endowment of \$1,000,000, to lengthen the span of life through the study of degenerative diseases incurred past the age of 50. The foundation will be known as the "Lasker Foundation for Medical Research." Lasker is a former chairman of the United States shipping board. He has been long interested in medical research.

Buys Ghost With Farm

A ghost was sold along with a farm at a recent auction sale at Kettering. It was the ghost of a woman, and she fetched £3,950 with the farm. She is the White Lady of the Falls of Harrington, whose ghostly career started during the reign of James I. In a fit of passion she killed one of the gardeners with a spade. Contrary to the usual custom among ghosts, it was she, and not her victim, who thereafter haunted the scene of the crime.

Hair for the best violin bows comes from white horses.

Minard's Liniment for sore throat.

War Weapons Used

To Aid Humanity

Airplanes and Army Tanks Carry Relief To Needy People

Another dream of the novelist has come true. Aeroplanes have been used in England to carry food to starving people in villages isolated by storms from ordinary communication with the outside world. The aviators were unable to find any landing-place, so the food was placed in bags and dropped by way of parachutes. The manifold uses to which the aeroplane can be put in time of peace are increasing in number everyday. It ought to be a tremendous satisfaction to those who have striven for years to perfect control of the air that their efforts are being utilized in the cause of humanity.

The past year has afforded many dramatic incidents similar to that recorded from England. The traditional and symbolic beating of swords into ploughshares is a more figure of speech compared to the literal and practical use of army tanks to crush a path through roads rendered impassable by snow and thus carry relief to those in need. It would be a great day for the civilized world if all the army aeroplanes and all the army tanks of the Powers could be converted into mail carriers and road rollers. Montreal Star.

Value Of Crop

Annual Value Of Saskatchewan's Crop Placed At Four Hundred Million

"In the field crops of Saskatchewan we have two 'Elin-Flons' annually," said the Hon. C. M. Hamilton, minister of agriculture in the provincial government, speaking on the topic of agricultural development in the province to the Saskatoon Kiwanis club.

He told of having read in the newspaper that the valuation of the ore in the Elin-Flon Mining area had been placed at \$200,000,000. While he was not attempting to minimize the value of other industries to Saskatchewan, Mr. Hamilton said, few people realized that the cash value of agriculture in Saskatchewan represented \$400,000,000 annually to the people of the province.

The Family Physician.—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

Britain's Merchant Marine

Empire Owns Half Of Existing Tonnage Of World

No nation suffered at sea as we did during the war. Our merchant marine was always in the front of the fight on all the world's oceans, and its losses were correspondingly severe. It almost looked for a time as though the casualties it met with would force us to relinquish for whole generations our pre-eminence as the chief carriers of the world's trade. Yet less than ten years after the close of the war we won half the existing tonnage, and we are building over three-fifths of the new vessels.

Greyhounds are faster than men, but not so speedy as racehorses.

WAS VERY WEAK NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes: "A short time ago I was troubled very badly with my heart and nerves, the cause of it, I think, was my going through the change of life."

"I was very weak and melancholy, and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well."

"I was advised to try

so I sent at once for a box; took them and got on better, and before they were all gone I felt good, my nerves are fine, I do not mind any noise, and I can sleep well. I can not recommend them too highly to those suffering as I did."

Price 50c, a box at all druggists and dealers, or by mail direct on receipt of price by The Milburn Co., Limited, Toronto, Ont.

Biplane Built For Experimental Purposes

New British Machine To Take "Soundings" Of Upper Air

A new biplane, specially designed for attaining high altitudes, is now at the Royal Aircraft Establishment, Farnborough, England. In this machine it is hoped to ascend to a great height and obtain "soundings" of the upper air. One theory to be tested is that, at 10 or 12 miles above the earth there are constantly moving currents of air travelling at 200 miles an hour and more. Such upper air tides as these might have a revolutionary influence on long-distance flying. The British machine which is to carry out this test is a Bristol biplane with an air-cooled Jupiter engine specially equipped for maintaining its power in rarified air.

It will probably be piloted by Flight-Lieutenant J. A. Gray, one of the most expert of the Government test pilots. For these high-altitude flights pilots are being provided with special air suits and helmets like those of diving suits, the airmen peering out through small circular windows. In one new plane the airman will be enclosed in a glass-windowed cabin, which will be automatically supplied with oxygen.

Miller's Worm Powders attack worms in the stomach and intestines at once, and no worm can come in contact with them and live. They also correct the unhealthy conditions in the digestive organs that invite and encourage worms, setting up reactions that are most beneficial to the growth of the child. They have not tested their power in hundreds of cases and at all times are thoroughly trustworthy.

Five Eclipses This Year

Three Will Be Of Sun, and Two Of Moon

For those whose interests centre to some extent in the astronomical world, the new year will satisfy them in that five eclipses are scheduled. Three will be of the sun, and two of the moon, the new year bringing the same number as in 1927. On May 19 there will be a total eclipse of the sun but the powers that be say it will not be visible in Canada. June 3 a total eclipse of the moon is forecast which will be visible in some parts of the West. Two weeks later the sun will go into a partial eclipse and on November 12 the performance is repeated. Western Canadians will have to take the word of the scientist for these because they will not be visible in the West. The last eclipse of the year will be on November 27 when the moon will be completely hidden. The eclipse will be visible throughout the North American continent.

The usual legal and national holidays will be on the program for the year with any additional ones the authorities might permit. To round off the twelve months, the year 1928 is the 19th year of the reign of King George V. and the 62nd year of Confederation will commence on July 1.

The King of Pain—Minard's Liniment

New York's Women Workers

Are Making Good In Lines Requiring Hard Manual Labor

One out of every three girls and women in the city of New York, over fourteen years of age, is engaged in gainful occupation, according to the reports of the United States Bureau of Census. The ratio of men working for salary or wages as compared to women so employed is considerably less than three to one. New York is truly a city of real opportunity, for the members of the "weaker sex," though judging from the work which some women are doing, the term "weaker sex" is a misnomer. There are in the city 691,727 females employed in offices, factories, shops and in almost every branch of work, financial, commercial and professional, which goes to make New York the metropolis of the world. About everything that a man does in the way of work, you will find some woman able and willing to do. In many lines, including some which require hard manual labor, women are giving the men a close run for their week's wages.

Question Is Settled

Who heads the family? A decision on this question has been reached by the United States Internal Revenue Bureau income tax regulations. The bureau says the head of a family is "an individual who actually supports and maintains in one household one or more individuals." It was found necessary to make such a ruling, as numerous many-headed families had been recorded on income tax returns.

The seven liberal arts, according to educators in the middle ages, were classified as grammar, dialects, music, arithmetic, geometry and astronomy.

Good Advertising Idea

B.C. Apple Grower Has Evolved Most Unusual Scheme

It is possible for fruit growers to have nature assist in producing designs on fruit, and a grower named Percy Coldron, of Penticton, has had success in the Okanagan area. The scheme might be tried as a novelty and the experiment will be of interest.

The means adopted to secure such a device is to cut out the design in paper and paste it on the apple before the coloring has started. The paper stencil keeps out the sun on the covered portion, the design thus standing out boldly against the rosy red of the remainder of the apple.

Mr. Coldron has produced all sorts of legends on his apples, other designs inviting people to "Eat B.C. Fruit," "Try Okanagan Apples," etc.

Weather conditions during the coloring period were poor this year, Mr. Coldron states, and he was not so successful as usual.

What "Toc H" Means

Stands For Talbot House Which Commemorates Heroes Of Flanders Fields

Probably nothing in the way of phrases is more widely known, and yet so little understood as "Toc H." A reader asks me to elucidate the mystery. It is described in one of its own publications as "Merely an affectionate diminutive the signaller's trick for saying 'T.H.' amid the noise of war." It stands for Talbot House, a memorial "house that love built" at Poperinghe, near Ypres, just 12 years ago, and commemorates young Gilbert Talbot, son of the Bishop of Winchester, and all the flower of manhood of Allied camp who fell in Flanders Fields. The lamp of remembrance in Toc H. Chapel—All Hallow's-by-the-Tower—is to be kept alight for all time to effect moral regeneration of the whole world.

Corn cannot exist when Holman's Corn Remover is applied to them, because it goes to the root and kills the growth.

Collie Has Own Method

A remarkable dog is owned by a farmer of Bajarg, Ayrshire. He is a black and white collie and answers to the name of "Laddie." Recently he was witnessed catching a rabbit; but he evidently was sensitive as to the spilling of blood and refused to worry the rabbit to death. Instead of that he hauled his captive to a barn, where he held his head under water till it was drowned. He has never, the farmer says, done other than drown his rabbits.

Making It Realistic

A bald-headed man in Kansas who believes in realism has two wigs, one with somewhat shorter hair than the other, which he substitutes about every ten days to make it appear he has just been to the barber.

Vegetable Man: "I have some mushrooms today, madam."
Shopper: "Are they edible?"
Vegetable Man: "No, ma'am, they're safe to eat."

A simple electric alarm that tells when the door to which it is attached swings open, is a French invention.

11 OUT OF 83

cases ended in death! So a recent Canadian investigation showed. These were not cases of infectious diseases—of consumption—of typhoid! They were cases where a person had sustained some slight injury—a cut, a burn, a wire-prick—and where the wound, being thought not serious enough for careful treatment, had been neglected. Blood-poisoning and death resulted. When you or your children sustain any injury, ensure against infection by applying Zam-Buk. This balm soothes the pain, stops bleeding, and by destroying all germs prevents blood-poisoning, etc. Hence no time need be lost from work or pleasure by those who use Zam-Buk. All dealers, 50c. box.

Zam-Buk

Preserving Historic Stone

Used By Army Of Edward IV. To Sharpen Swords In 1471

At the Griffin Inn, Whetstone, England, stands an old stone on which the army of Edward IV. are said to have sharpened their swords on the way to the Battle of Barnet, on April 14, 1471.

When it was heard that the inn was to be reconstructed it was feared that this historic stone would be removed. This is not so, however; the stone is to remain on the spot on which it stood on the day of the battle.

The Griffin Inn itself was made famous by George Morland, the painter, who, in finding himself unable to pay his bill for herrings and gin, "paid" it by painting a sign for the inn. The sign was lost during a snow-storm thirty years ago.

Grippe.

Heat and inhale Minard's. Also rub it on throat and chest. The great preventative.

Million a Week For Liquor

Canada's domestic production of alcoholic beverages last year was \$40,000,000 and importations also about \$10,000,000. Exports amounted to \$26,000,000, so that Canada's liquor bill is \$54,000,000 or over an million a week.

New French hydroplane, a practically wingless seaplane type of glider which just skims the water surface, given good conditions, could cross the Atlantic in two days.

As men grow older they are apt to talk less and say more.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it's not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Looking Back!

SATISFIED customers have been largely responsible for the progress and growth of this Bank for nearly sixty years.

To-day, more than ever, we try to bring a human sympathy and an intimate understanding into our daily business contacts.

TOWN AND DISTRICT

Read H. Castella's announcement concerning Standard coal.
Read what Hugh G. Bates says in this issue about his new drill.

In the town at present hockey is the main topic of conversation.

Another dance is to be given in Livingstons School on Friday, Feb. 17, to aid in paying for a new piano. Lewis' orchestra in attendance.

Born at Mrs. Cocks' hospital on Friday, Feb. 3rd, a son to Mr. and Mrs. Prichard, of C. P. R. headquarters at Hammerhill.

G. C. House and J. O. Bogstie Monday night shipped another fine bunch of work horses for High Prairie.

Gleichen's combination is a real genuine "sport team"—all home-made. Gleichen does not believe in hiring men to get fun. We want the fun ourselves.

Despite the ground hog seeing his shadow on the 2nd, the ducks are coming north, Mr. and Mrs. Gopher ramble about and Old Sol and the barmy chinook make life pleasant.

There will be no service in St. Andrew's Church next Sunday, but Sunday school will be held at 11 a.m. The W. A. meets at Mrs. Cuthbert's home at 3 o'clock Thursday afternoon.

Dr. E. G. Simmonds at present is in Mrs. Cocks' hospital recovering from an attack of appendicitis. Dr. Scott of Bassano has been attending him and Dr. Simmonds will be at his office again within a few days.

Mr. and Mrs. Addison Wilson left for Calgary Monday afternoon where Mr. Wilson will take a course in tractor or machinery and it is hoped the change will be beneficial to Mrs. Wilson who has not enjoyed good health for sometime past.

Stobart must have been seeing lively times again last Saturday night. Will Ferguson is reported to have called up Bremner's Radio Orchestra in Calgary with a request for a Highland schottische as a special request number, which was afterwards given. Why not get Will out for a step say at the next annual old-timers' ball in Gleichen.

A. E. Henson, the new proprietor of the Gleichen Meat Market, is advertising to purchase beef cattle, hogs, poultry from the local farmers. He states he prefers to buy locally in order to pay the best prices and also to sell at the lowest by saving on express and freight rates. He has the right community ideas and should win out.

Mrs. W. F. Durston of Milo, convenor of the Gleichen District of Women's Institutes, has been officially visiting the various branches, and spent last Friday night with the Gleichen branch, when she addressed the members and a few invited friends in the Community Hall Club room. Mrs. Durston gave a resume of the work accomplished by the various branches she had visited last year which proved very interesting and instructive. After the meeting a pleasant time was spent with cards and a light luncheon was served.

A number of Gleichen members of the I.O.O.F. Lodge attended the Installation of officers in the Bassano lodge. District Deputy S. E. Dafeo, Bro. Greer, L. Sather, R. K. Hunter, Wm. Bain and M. S. Schrider of Walsh, Grand Warden were present. Going to Bassano in the afternoon, the friends were royally entertained and their trip will be a pleasant memory for some time. During the evening a game of bowling was played between Dafeo and Bain against Hunter and Sather which to this day remains a tie and for which the rubber will have to be played yet. At Lodge a very social evening was enjoyed after the ceremony when the Grand Warden addressed the meeting on many points of Oddfellowship. Lunch was served and the time passed away until train time arrived for the Gleichen friends, who returned in the early morning hours.

REMARKABLE WHIT HORSE IN NEW WESTERN PICTURE

Silver Buck, the popular horse owned by Buck Jones, once more is proving that animals are just as good in their own capacity as biped stars. Silver Buck has an important role with the famous Western star in his new Fox Films production, "Chain Lightning," which will have a showing at the Gleichen Community Hall, next Saturday, Feb. 11th. Silver Buck portrays the famous

horse, Polester, the favorite mount of Steve (Flash) Lannon (Buck Jones), who, during Lannon's absence in San Francisco, is rustled by Campan and his notorious gang of horse thieves.

Silver is driven along with a band of other horses through a treacherous canyon to the lair of the outlaws and there put into a stable along with the other animals. The horse, however, has become unpopular with the thieves, due to his fighting spirit.

Once in the corral the villains heave a sigh of relief. Then they are startled with a tremendous crash. The enraged white horse has broken his bonds and has leaped the high barbed-wire fence and is racing away towards the canyon. He stumbles into a covered pit, a decoy of the thieves, but once again he bounds to his feet and is seen flying toward his ranch.

Silver is Buck's constant pal and has appeared with the star in more than twenty-dramas of the West. Buck states that the horse has never failed him in anything that he is scheduled to do and that many times
